

AHS Monitoring Measures 2021-22 FQ4

Monitoring Measures are used internally to help inform some areas of the health system outside the Performance Measures in the AHS Health Plan and Business Plan.

Most of the reported results continue to be impacted by COVID-19.

Please use caution when comparing the results from current quarters during the pandemic with the data from previous years under normal operation.

Prepared by Data & Analytics

The Monitoring Measures report is also available as an interactive dashboard:

[AHS Monitoring Measures: Welcome: Contents - AHS Tableau Server \(albertahealthservices.ca\)](#)

Most of the reported case volumes continue to be impacted by COVID-19. Please use caution when comparing results from the quarters during the pandemic with data from the previous years under normal operation.

* Measure reporting lagged by one quarter.

1. Family Practice Sensitive Conditions are reported as a crude rate.

2. The measure "Health Link Alberta Calls Answered within Two Minutes" is no longer being reported as a Monitoring Measure because Health Link has expanded their business to include more services. Therefore, in order to better represent the business, this measure was changed as of October 2021 to two separate measures: 1) "Health Link Median Wait Time before Calls Answered (Minutes) - Clinical" and 2) "Health Link Median Wait Time before Calls Answered (Minutes) - Non-Clinical". Clinical calls include: Nurse, Addiction & Mental Health, COVID Clinical, and Rehabilitation Advice Line. Non-Clinical calls include: Information & Referral, Influenza, COVID Non-Clinical, Catch a Break, Tobacco, Central Access, and Immunization Booking. These measures are reported at the Province level only.

Data as of May 13, 2022

Most of the reported case volumes continue to be impacted by COVID-19. Please use caution when comparing results from the quarters during the pandemic with data from the previous years under normal operation.
