# ACP/GCD – Proven Working Solutions: Integration in your documentation system

Integrate ACP/GCD prompts and fields in your documentation system for your health care providers.

Here is a non-exhaustive list of ideas / solutions:

- Check boxes on your paper working form
- Tabs/ fields/templates/headers/reminders in your electronic system

Be creative, do not assume your system cannot do it, get in touch with your vendor/IT support, then finally inform and train your healthcare providers on how to document.

Example:
Family Practice EMR – Goals of Care Template

Example:
Outpatient Clinic - Paper checklist
