

Safeworks Monthly Report – May 2023 Supervised Consumption Services

June 8, 2023

Background

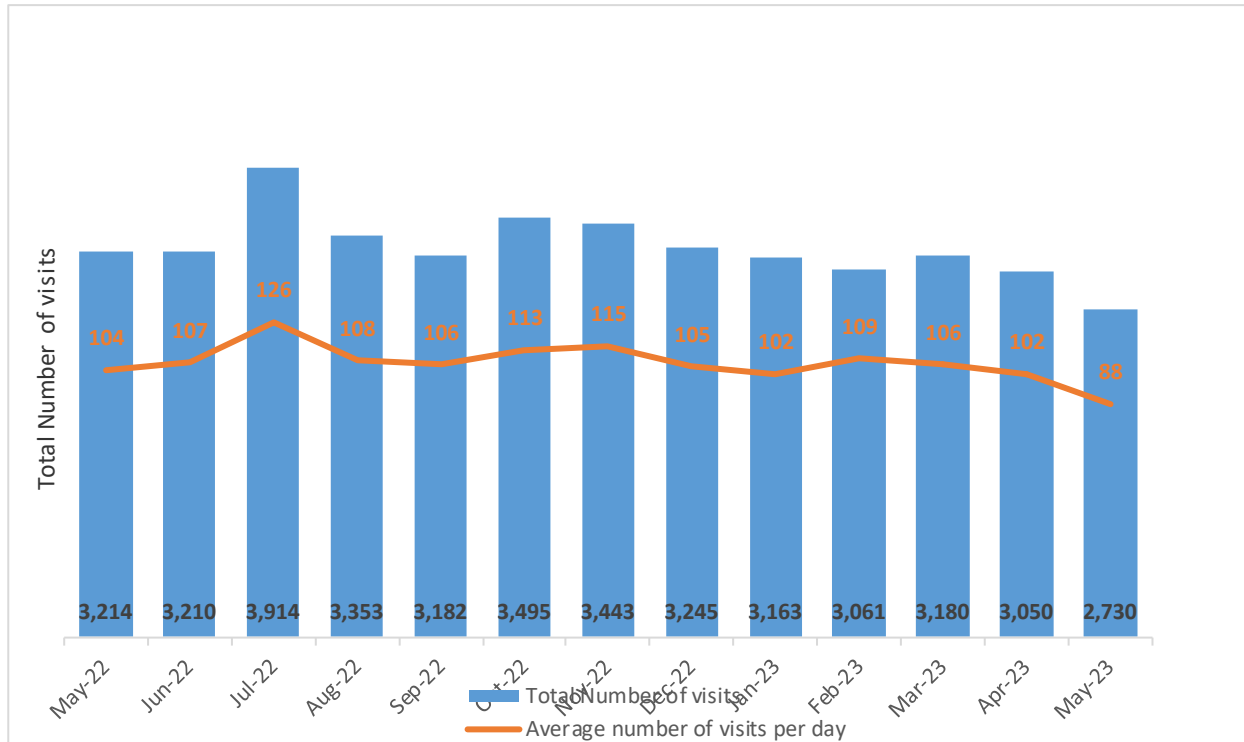

Safeworks Supervised Consumption Services (SCS) launched on October 30, 2017 in a temporary facility at the Sheldon M. Chumir Health Centre with a federal exemption to the Controlled Drugs and Substances Act from Health Canada. On January 15, 2018, the temporary facility closed, and the permanent facility inside the Sheldon M. Chumir Health Centre opened for operations. On April 30, 2018, Safeworks began offering services 24 hours, 7 days a week.

Service Uptake

From the start of operations on October 30, 2017 to May 31, 2023, Safeworks SCS had **274,247 client visits**. In May 2023, the site saw **524 unique individuals** in **2,730 visits** with an average of 88 visits per day.

Uptake of services declined in the spring of 2020, during the COVID-19 response. Safeworks SCS decreased booth capacity from six booths to three booths on March 19, 2020, following public health recommendations. On July 20, 2020, booth capacity was increased to the full complement of six booths with proper infection control measures in place. Due to the rise in COVID-19 cases in the fall of 2020, booth capacity was again reduced to three on November 10, 2020. On July 21, 2021, booth capacity was once again restored to six booths and continues to operate at that capacity.

Drug Use and Overdose Prevention and Response

In May 2023, drugs were consumed on site under the supervision of registered nurses (RNs) or paramedics **2,139 times**. With each client who uses drugs by injection, RNs and paramedics are available to provide education on vein care, infection prevention, and injection technique. In May, there was 307 instances of intranasal use (snorting).

The most frequently reported drugs used in May 2023 were methamphetamine (714 times) and fentanyl (903 times).

Overdose response kits (containing Naloxone) and overdose prevention education are offered to all clients accessing Safeworks SCS. In May 2023, SCS staff distributed **304 overdose response kits**.

Since operations began on October 30 2017 to May 31, 2023, Safeworks staff have responded to a **total of 6,174 overdoses**.

In May 2023, Safeworks staff responded to **143 overdoses**. Of these, 143 required supplemental oxygen, 48 required naloxone and 4 required an EMS response.
