

High Capacity Weigh Scales in Alberta

Purpose:

This resource is intended to provide a list of high capacity weigh scales to support the needs of patients and health care providers who need access to them.

Home and office based scales often have a maximum capacity of 300 - 400 lbs and 330 lbs respectively and may require individuals to step up onto a small base.

It is hoped awareness of these resources will help:

- Health care providers and patients access appropriate equipment across the province or in their health zone.
- Health care providers obtain accurate weight measurements in a safe, respectful and dignified setting to inform clinical treatment decisions (e.g. avoid using a loading dock to measure weight).

Accessing these resources:

**WHEN REFERRING INDIVIDUALS TO OR ACCESSING SITES WITH HIGH CAPACITY SCALES,
PLEASE BE AWARE OF THE FOLLOWING:**

- Not all scales can be accessed by the public. Some sites limit access to only patients attending at that site.
- The site **MUST** be contacted by the patient's health care provider **BEFORE** an individual attends to confirm hours and access. Wheelchair accessible sites are denoted by the symbol 
- People who require assistance for mobility **MUST** bring a person(s) capable of assisting them. Health center staff will not provide physical assistance to anyone using the scales.
